There are also a number of other administrative actions you can complete from the mail2web.com Control Panel. From time to time you may need to log into your control panel to complete some of the following actions...

- Update your Billing Information or Personal Details
- Change your Administrative Password
- Add or remove Vanity SSL for use with your Online Store
- For Advanced users, upgrade your account to Shared Hosting with myhosting.com

All this and more is available from your mail2web.com Control Panel and is explained in more detail in our Knowledge Base.
